Next steps

Overview

OVERVIEW

As organizations prepare for Oracle AI Databas
applications, success depends on modernizing
systems and infrastructure to the platform serv
available, and resilient.

IBM® Power® helps organizations modernize the
database. By bringing Oracle databases, applica
infrastructure together on a single enterprise pl
phased journey that supports continuous busin
investments and preparing for Oracle AI Databa
growth. Every Oracle environment is different. C
modernization strategy and define the right pat

CASE STUDIES

Real stories. Real impact.

Sicredi Bank and IBM

Sicredi Bank

"We modernized Oracle on AIX to IBM Power11 in just over three months—making the migration completely transparent to the business, with zero customer impact, zero lost transactions, and uninterrupted payment services." — Gabriel Federizzi, IT, Sicredi
